

Personal Cloud

BeeStation

Create your own cloud in minutes

With a built in 4 TB¹ hard drive and everything preconfigured, BeeStation is ready to use in minutes as a private cloud alternative. It is designed for personal storage, syncing, and sharing of files and photos with minimal setup. BeeStation brings content together from your phone, tablet, computer, external drives, and supported cloud accounts, so you can manage and access everything remotely without any subscription fees.

Highlights

- Scan a QR code to get started in minutes, no complex setup required
- Bring files from computers, tablets, phones, external drives, and supported cloud accounts into one place, then access and manage them remotely
- Back up photos from your phone and iCloud Photos², then use local AI to look for people or subjects
- Edit files on your desktop while keeping changes synced across your computers
- Protect data by default with snapshot based restore points to help recover from ransomware
- Share files and photos publicly, or share privately with BeeStation shared users
- Includes 3 months of BeeProtect, a privacy first cloud backup that helps protect BeeStation against physical damage
- 3-year warranty included

Set up in minutes

Scan a QR code, plug in the power and Ethernet cables, and press a button to confirm—that's all you need to do after unboxing. After that, you're all set to start transferring files or photos to your private cloud storage, and focus on what truly matters.

Store everything here. Access anywhere.

With 4 TB¹ of storage space, you can store all your work and personal files here. Once they're on BeeStation, you can reach them from any web browser, as well as from the desktop or mobile apps. Also, since you can use your Google Account, Apple ID, or Synology Account to sign in, you won't have to remember any extra logins.

Never max out phone storage again

Backing up photos to BeeStation is as simple as opening the app. Just got back home from a trip? Turn on Focus Backup, and let thousands of photos upload overnight while you rest. Once backed up, your photos will be securely stored and accessible wherever you go.

Gather your scattered photos under one roof

Managing photos across cloud storage and external drives can be a hassle. With BeeStation desktop app, you can transfer images from Google Photos, USB drives, or local folders on your computer to manage them in one place. You can also connect your iCloud Photos for automatic downloads, ensuring a local

backup is available to protect against accidental deletions.²

Photo organizer driven by local AI

Powered by its built in NPU, BeeStation helps you quickly find people, subjects, and places. Browse photos by location on a world map and rediscover memories without manual sorting.

Keep your cloud and USB files in one place

Got files all over the place? BeeStation can sync files from Google Drive, OneDrive, Dropbox, including their collaborative workspace³, as well as back up any connected external and flash drives. That way, if you ever lose access to a cloud account or can't find a physical external drive, you can rest easy knowing you've got a backup.

Got room to spare? Share the storage with others

Share storage with up to 8 users on one BeeStation. Send an invitation link to give each person their own private cloud space, completely separate from others. Users on the same BeeStation can also share files and folders, whether working on the same project or collecting family photos, allowing everyone to view, upload, or remove files directly from the BeeStation interface.

Comprehensive PC protection with Acronis True Image

Back up the entire Mac or PC with Acronis True Image to BeeStation for peace of mind. Every BeeStation includes a 3-year Acronis True Image license, supporting full-system backups, one-click recovery, and ransomware protection

to ensure fast system restoration and data safety.⁴

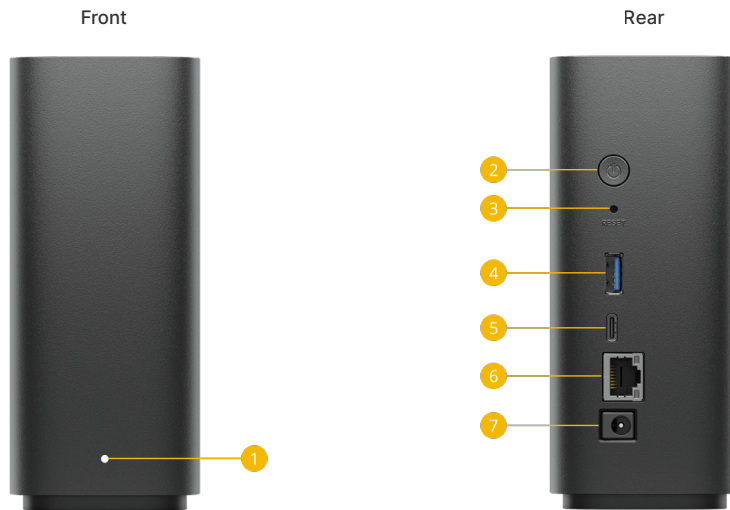

One copy is not enough. Back up your BeeStation

Following the 3-2-1 backup principle, BeeStation allows you to create an additional copy of your data by backing up to another Synology NAS or an external drive. This ensures your files remain safe and recoverable even if your BeeStation is lost or damaged.

BeeProtect – Affordable, set-and-forget cloud backup

Every BeeStation includes a complimentary 3-month BeeProtect subscription, a privacy-first cloud backup service featuring client-side AES-256 encryption. This ensures all your data is encrypted with your password before being uploaded. With your files stored off-site, you can retrieve them anytime through a web browser if your BeeStation is no longer accessible due to theft, damage, or loss. Technical Specifications

General Specifications

Hardware	
Model Name	BST151-4T
Capacity	4 TB ¹
Drive Type	HAT3300-4T
Processor	Realtek RTD1619B
Memory	2 GB DDR4
LAN port	1 × 1GbE RJ-45
External ports	<ul style="list-style-type: none">• 1 x USB-A 3.2 Gen 1 port• 1 x USB-C 3.2 Gen 1 port

Product dimensions (HxWxD)	148.0 × 62.6 × 196.3mm
Weight	820 g
Power Recovery	Yes
Power Supply Unit / Adapter	36 W
AC Input Power Voltage	100V to 240V AC
Power Frequency	50/60 Hz, Single Phase
Power Consumption	<ul style="list-style-type: none"> • 7.84 W (Access) • 1.66 W (HDD Hibernation)
British Thermal Unit	<ul style="list-style-type: none"> • 26.75 BTU/hr (Access) • 5.66 BTU/hr (HDD Hibernation)
Operating environment	<ul style="list-style-type: none"> • Temperature: 0°C to 35°C (32°F to 95°F) • Relative humidity: 8% to 80% RH
Storage environment	<ul style="list-style-type: none"> • Temperature: -20°C to 60°C (-5°F to 140°F) • Relative humidity: 5% to 95% RH
Software	
Supported browsers	Google Chrome®, Firefox®, Microsoft Edge®, Safari® 14 and above
System requirements	<p>BeeStation for desktop</p> <ul style="list-style-type: none"> • Windows 10 2004 (19041) and above, Windows 11⁵ • macOS 12.3 or above <p>BeePhotos and BeeFiles mobile apps</p> <ul style="list-style-type: none"> • iOS 16 or above • Android 10 or above (BeeFiles) • Android 10 or above (BeePhotos)
