## **DS223**j

# All-in-one file management and sharing hub

The DS223j is an efficient one-stop solution for all your data storage and sharing needs. With two bays of storage and Synology DiskStation Manager (DSM) on board, the DS223j allows you to create a private cloud to protect your files, share your data across several devices, store security footage with intelligent video surveillance tools, and more.

## Centralized Data Storage Consolidate all your data with complete data ownership and multi-platform access

- Next-Generation File System
   Leverage file self-healing, lightning-fast data snapshots, and rapid data cloning<sup>1</sup>
- Secure Sharing and Syncing
   Safely access and share files and media
   from anywhere, and keep clients,
   colleagues and collaborators on the same
   page
- Simple Data Protection
   Back up your media library or document repository to a variety of destinations
- Versatile Camera Surveillance
   Protect your premises with flexible monitoring tools

#### **Access Your Files Anytime, Anywhere**

Organize data scattered across devices. Your Synology NAS can serve as a go-to platform to securely and conveniently store any type of data with comprehensive and intuitive access and management tools.

- Enable QuickConnect to access your NAS securely from anywhere without configuring complex port forwarding rules
- Browse and manage your files and media from any browser with Synology Drive, or access
  data through your default file browser using common network protocols
- Keep your photos and videos organized using Synology Photos' smart sorting functions
- Deploy your Synology NAS as edge storage and fit it easily into existing infrastructure thanks to Windows AD and LDAP integration

#### **Collaboration and Synchronization Platform**

Easily share documents with colleagues and boost productivity while working in a team or with your clients.

- Build a private data cloud for easy file management and sharing across all platforms, and keep data in sync between two Synology systems with Synology Drive
- Synchronize data to and from popular cloud storage platforms with Synology Cloud Sync
- Share media with colleagues or collaborators through the privacy-focused sharing options in Synology Photos

#### **Flexible Data Protection Options**

Synology DSM comes with a host of backup and data protection solutions available at no extra cost.

- Leverage Synology Drive to protect data from ransomware attacks or accidental deletion with real-time or scheduled backup of your PC folders
- Safeguard photos and videos taken on mobile devices by automatically creating remote copies with Synology Drive or Synology Photos

- Efficiently back up your entire Synology NAS or select folders to multiple destinations using Hyper Backup
- Store backups off-site on C2 Storage,<sup>2</sup> a dedicated and secure cloud destination powered by Synology C2
- Create point-in-time snapshots with Snapshot Replication, allowing users to reverse any unplanned or unwanted changes<sup>2</sup>

#### Versatile and Private Video Surveillance

**Synology Surveillance Station** transforms any Synology system into a powerful network video recorder (NVR).

- 8,700+ supported camera models
- ONVIF support for a broader selection of cameras
- Private, subscription-free storage of recordings
- · Access through web browsers, desktop clients, and mobile apps
- Event-based rules to trigger specific actions
- Email, SMS, and push notification options
- Simultaneous recording to the cloud with C2 Backup for Surveillance for an extra layer of data protection and more convenient sharing<sup>11</sup>

#### Notes:

- 1. Feature available from DSM 7.2.
- 2. C2 Storage for Hyper Backup requires purchase of an eligible annual or monthly subscription. A free trial is available for each newly registered device.
- 3. C2 Surveillance requires purchase of an eligible annual subscription. Each additional channel requires a separate subscription. A free trial is available.
- 4. System snapshots include snapshots taken by SAN Manager and Snapshot Replication.
- 5. Surveillance Station includes two free licenses. Connecting more cameras and devices requires additional licenses. Learn more

## **Packages and Applications**

#### **Synology Drive**

Synchronizes files across Windows®, macOS®, Linux®, Android™ and iOS. The built-in cross-platform portal allows access to data anytime and anywhere

Maximum Number of Users	5
Maximum Number of Hosted Files	100,000 (applies to files indexed or hosted by Synology Drive. For file access through other standard protocols, refer to the File Services section above)

#### **File Station**

Provides virtual drives, remote folders, Windows® ACL editor, compression/extraction of archived files, bandwidth control for specific users/groups, creation of sharing links, and transfer logs

SA	N	Ma	ana	ger

Maximum iSCSI Target Number	2
Maximum LUN	2
LUN Clone/Snapshot, Windows ODX	Yes

#### **Hyper Backup**

Supports local backup, network backup, and data backup to other servers and public clouds, including C2 Storage

#### **Snapshot Replication**

Maximum Snapshots per Shared Folder	128
Maximum of System Snapshots	256

#### **Synology Office**

Maximum Number of Users	5
